

CARE INSTRUCTIONS

BRILLIANT® HIGH GLOSS PANELS

HIGH-GLOSS ACRYLIC SURFACES:

Acrylic surfaces are comparable with “piano varnish” in terms of visual appearance and shine. The surfaces are treated at the factory with a protective paste. Preserve the beauty of your furniture by caring for it properly.

CARE INSTRUCTIONS:

- * Clean the surfaces with a soft cloth and 1% soap suds.
- * Rinse with clear water and dry the surface with a chamois leather or soft cloth.
- * Treat the surfaces regularly (at least after 12 months) with the obtainable polish.
- * Before using it, shake the polish well, pour some onto the polishing sponge and distribute it evenly in a thin film.
- * After around 30 minutes, wipe off the dried film with a micro-fibre cloth.

!!! CAUTION:

- * Do not use any abrasive agents or agents containing alcohol (e.g. glass cleaner, ethyl alcohol), Nitro solution or Trichloroethylene (Tri)!
- * Furniture polish or “Tisch-Finish 2” (preservative agents for solid wood work tops) form a film and are therefore not suited.
